EDUCATION

•Sahyadri College of Engineering and Management, Adyar, Mangalore. *December 2021 - May 2025*
Bachelor of Engineering in Computer Science and Engineering. CGPA : 7.8

•Siddartha Pre-Univesiity College,Bhatkal,UttaraKannada. *May 2019 - April 2021*
Karnataka State Board. Percentage :93.66

SKILL SUMMARY

- **Cloud Platforms:** AWS (EC2, S3, Lambda, CloudFormation, etc..), Azure.
- **Programming Languages:** C, C++, SQL, HTML, Python, Java.
- **Developer Tools:** Git/Github, MySQL, VS Code.
- **Operating Systems:** Windows, Linux, Kali Linux.
- **Soft Skills:** Leadership, Event Management, Teamwork, Creativity.

KEY PROJECTS

•Image Re-sizer Project | Link *May 2025*

– Developed a Python application to automatically resize images and upload them to Azure Blob Storage.
– Implemented CI pipeline using GitHub Actions for automated testing and deployment.
– **Technologies:** Python, Azure Blob Storage, GitHub Actions, Docker

•Coverage Path Planning Algorithm for Robustic Application | Link *Nov 2024*

– Designed and developed a path-planning algorithm for autonomous navigation, handling static and dynamic obstacles; built real-time simulations using Python and ROS, ensuring 100% area coverage with minimal backtracking; optimized algorithm performance, reducing path calculation time by 25% with heuristic-based optimizations.
– **Technologies:** Python, ROS, NumPy.

INTERNSHIPS

–Software Engineer Intern (MRI Software) | Link *January 2025 - Present*

∗ Contributed to full-cycle software development, optimizing code to enhance performance; wrote and optimized test cases, achieving 98% code coverage; collaborated with cross-functional teams (DevOps, Developers, QA) to reduce system downtime by 20%; participated in code reviews to ensure code quality.
∗ Technologies used: AWS, Python, SQL, Docker, Jenkins, MySQL, Linux.

CERTIFICATIONS

∗KodeKloud Labs: The Complete DevOps Bootcamp (KodeKloud) | Certificate *March 2025*

· The Complete DevOps Bootcamp, gaining hands-on experience in CI/CD, Docker, Kubernetes, and cloud computing, improving deployment efficiency by 90% and enhancing system scalability by 85%.

∗AWS Cloud Practitioner Essential Certification (AWS) | Certificate *November 2024*

· Gained foundational experience with AWS services (EC2, S3, Lambda) for building scalable, secure cloud applications, improving deployment efficiency by 80-85%; learned to configure IAM roles, VPCs, and automate deployments using CloudFormation, enhancing security by 80-90%.

∗Azure Beginners : Cloud Fundamentals Challenge (Azure) | Certificate *March 2023*

· Developed hands-on expertise in Azure services, provisioning and managing cloud infrastructure with Virtual Machines, Blob Storage, and SQL Databases, increasing operational efficiency by 40-45%; implemented secure, scalable solutions by configuring RBAC, deploying serverless functions with Azure Functions, and using Azure Resource Manager (ARM) to orchestrate resources, boosting security by 20-30%.
